Additional Declaration

The consignment of Immature Coconuts (*Cocos nucifera*) from Fiji to Australia contains:

- 1. Immature Coconuts only.**

- 2. The Following Characteristics was used to determine immaturity**
 - i) The coconut was full of fluid, which does not make a splashing noise when shaken.
 - ii) The pericarp (outer Husk) was soft and sappy, irrespective as to whether it is green ,yellow or orange in color
 - iii) The flesh appears gelatinous (when the nut is opened) and not firm as in a normal, mature nut.
 - iv) The Nut is incapable of germination.

- 3. The first three criteria above was used as subjective means of verifying claims of immaturity coconuts**

- 4. All immature coconuts is of FIJI Origin**
